Abinaya Gowthaman

Java Developer

abinayagowthaman004@gmail.com | +91 9384755020 | Manamadurai, Sivagangai | LinkedIn | GitHub

SUMMARY

Final-year Computer Science student with practical experience in developing Java-based applications using Spring Boot and REST APIs. Proficient in backend development, database integration, and building secure application workflows. Knowledge of AWS, Docker, and Jenkins, with a strong interest in developing scalable and efficient software solutions.

EXPERIENCE

Web Development Intern | NEHA SOLUTIONS, Pollachi, Tamil Nadu — Jun 2025 - Jul 2025

- Designed and developed backend modules for the Rentease rental application using Java, Spring Boot, and REST APIs.
- Implemented JWT-based authentication and role-based access control (RBAC) for secure user authorization.
- Developed and tested RESTful authentication APIs using Postman to validate login and access control workflows.

PROJECTS

ConnectHub – Temporary Chat Application | Live · GitHub

- Developed a real-time private chat application using Java 21, Spring Boot, React, and PostgreSQL, supporting 2 concurrent users per room.
- Implemented JWT authentication, BCrypt password hashing, and Spring Security to provide secure user access and protected API endpoints.
- Integrated WebSocket, STOMP, and SockJS for bidirectional messaging, with room management, online user tracking, and join/leave notifications.
- Designed 6-character unique room codes and temporary session-based messaging, deploying the frontend on Vercel, backend on Render, and PostgreSQL database on Supabase.

Technologies: Java, Spring Boot, React, PostgreSQL, REST APIs

Notes App – CI/CD Deployment | Live · GitHub

- Developed a full-stack Notes application using Java, Spring Boot, React.js, and PostgreSQL, implementing CRUD operations through REST APIs.
- Configured a 4-stage Jenkins CI/CD pipeline integrated with GitHub Webhooks to trigger automated builds on every code push.
- Implemented containerized deployment using Docker, AWS EC2, and Nginx, achieving an end-to-end deployment time of approximately 3 minutes.

Technologies: Java, Jenkins, Docker, Maven

SKILLS

- **Languages:** Java, SQL, Python
- **Backend:** Spring Boot, Spring Security, Spring Data JPA, REST APIs
- **Databases:** PostgreSQL, MySQL
- **Cloud & DevOps:** AWS, Docker, Jenkins
- **Tools & Core:** Git, GitHub, Maven, Postman, DSA

CERTIFICATIONS

- **HackerRank SQL (Advanced)**
- **Oracle Autonomous Database Cloud 2025 Certified Professional**
- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate**

AWARDS & ACHIEVEMENTS

- **LeetCode** — Solved 210+ coding problems, strengthening data structures, algorithms, and problem-solving skills.
- **Event Coordinator – Code Debugging** — Organized and coordinated a technical Code Debugging event during the college symposium.
- **VS Code Extension Developer – Interview Mode** — Developed and published a VS Code extension with a 45-minute coding timer, randomized constraints, and interview simulation features.

EDUCATION

B.E in Computer Science and Engineering | AAA College of Engineering and Technology | CGPA: 8.17/10 — 2023 - 2027
